Pytec IT Recruitment Managed Agency Solution

Pytec's Managed Agency service enables clients to streamline their IT recruitment process by effectively outsourcing their IT recruitment requirements. One of our account managers will become your single point of contact and handle all stages of the recruitment process on your behalf. We take over much of the workload allowing your hiring managers, Human Resources department and back office staff to focus on their own priorities.

Acting as lead supplier, we become the 'first port of call' for all your IT recruitment needs. In situations where your volume of recruitment requires additional resource we employ the services of approved secondary suppliers and continue to manage the recruitment process for you. All CV's are submitted via Pytec and we become the point of contact for all other suppliers. This means you receive the most focused, cost effective and efficient IT recruitment service possible with a significant reduction in administration costs.

The benefits of using Pytec's Managed Agency Service include:

- **A single point of contact for all IT recruitment** meaning you only need to speak to one named person at one supplier.
- **Access to the best available candidate pool** from the work and resources of multiple agencies.
- **Reduced and more predictable recruitment spend** with more visibility. We can negotiate on your behalf with secondary suppliers to ensure we deliver the most cost effective quality focused IT Recruitment solution.
- **Reduced administration for payments** - you will only have to pay one supplier.
- **All CV's are vetted for suitability** by an experienced consultant at Pytec thus saving you time sifting through low quality CV's.
- **Enhanced candidate information** - Pytec ensure that all CV's forwarded to your organisation have a completed cover sheet with key information about the candidate.
- **Management of all third party suppliers** resulting in increased client productivity and efficiency with reduced administration and procurement workloads.
- **Reduction in time spent dealing with problems and disputes** - any CV duplication issues are handled by Pytec.
- **Full control over who is supplying your organisation.** If required Pytec will vet the supplying agencies on your behalf, however the final choice of secondary suppliers is entirely yours, or if you wish we can select them for you. Incumbent suppliers can be transferred to Pytec's management and signed up to the agreed fee structure.
- **Reduction in time wasting sales calls** - your line managers can simply tell agencies that all IT recruitment is handled by Pytec and ask them to call us instead.
